N60087.AR.000465 NAS BRUNSWICK 5090.3a

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGIONI

J.F. KENNEDY FEDERAL BUILDING, BOSTON, MASSACHUSETTS 02203-2211

October 17, 1994

Mr. Fred Evans Department of the Navy Northern Division Naval Facilities Engineering Command 10 Industrial Highway, Mailstop 82 Lester, PA 19113-2090

Re: Draft Final Workplan Site 9 Neptune Drive Disposal Site

NAS Brunswick September 1994

Dear Fred:

The United States Environmental Protection Agency (EPA) has reviewed the above referenced document. The EPA's comments are found in Attachment I of this letter. Should you have any questions regarding the EPA's comments, please feel free to call me at (617) 223-5521.

Sincerely,

Robert Lim, Remedial Project Manager Federal Facilities Superfund Section

ATTACHMENT I

The following are the EPA's comments pertaining to the document entitled Draft Final Workplan Site 9 Neptune Drive Disposal Site dated September 1994.

G neral Comments

- 1. The final workplan should identify the laboratory that will be conducting the laboratory analysis.
- 2. As presented in the workplan for the West Runway Area, this workplan should provide summary tables showing the laboratory analytical program. A copy of the summary table from the West Runway Area workplan is attached (see attachment II).

Specific Comments

- 3. Page 2-4, ¶ 2: For organic sample collection, isopropyl alcohol should also be used prior to the last deionized water rinse.
- 4. Page 3-18, ¶ 3: a) Regarding soil sampling from the backhoe bucket, the EPA suggests that the soil samples be collected from the center of the backhoe bucket to avoid contact with the bucket.
 - b) Please specify the selection procedure for determining the "one soil sample per test pit and one soil sample from the soil boring" which will be sent for off-site laboratory analysis.
- 5. Page 3-19, ¶ 2: If a bailer will be used for groundwater sampling, text should identify material of support lines. In addition, support lines must not be constructed of any material that could cause contamination.
- 6. Page 3-20, ¶ 2: As well as in the summary table, please specify or reference in text the groundwater level measurement procedure.
- 7. Page 4-9, 2nd Bullet: The workplan specifies that vinyl chloride will be analyzed using a low level selective-ion-monitoring (SIM) method, however the EPA recommends the use of EPA Region 1 Special Analytical Services Method 524.2 and revisions for low concentration organics (see attachment III).
- 8. Page 4-10, ¶ 1: For your information and possible use, the EPA is providing the Navy and ABB-ES, Inc. with a copy of Region I Tiered Organic and Inorganic Data Validation Guidelines. This tiered approach has been recently developed by the region.
